

## ACEAS Budget Information

### Overview

The priority of the ACEAS funds is to support postdoctoral research associates. Limited additional funding to support fieldwork (and therefore the work of postdocs), travel and other expenses are available.

More detail about the budget is available in the Project Proposal [here](#). The budget was agreed upon at the time of the Multi-Institutional Agreement and formal processes surround any changes to that budget.

### Travel

Any travel undertaken using ACEAS funds MUST be directly related to ACEAS research and co-funding of travel should be obtained whenever possible. [Download this document to get more information.](#)

Are you a postdoc?

Budgets for travel for postdocs are controlled by the postdoc's institution.

There is no funding available for ACEAS PIs or affiliates.

### Logistics and Equipment

The scope of the supported ACEAS logistics is:

- Seal tagging at Macquarie Island
- Marginal Ice Zone (MIZ) Voyage

- Denman Marine Voyage
- Denman Terrestrial Campaign

Operating costs for fieldwork and its related equipment have been worked out with the leader of each campaign and any questions should be forwarded to them prior to contacting the Project Office.
